LINUX INFRASTRUCTURE | PYTHON AUTOMATION | PRODUCTION SUPPORT | DATA & AI

Master's student in Computer Science with hands-on experience supporting Linux production environments, telephony infrastructure, SQL databases, operational automation, and enterprise systems. Experienced in troubleshooting production incidents, auditing business workflows, and improving operational efficiency through automation.

EXPERIENCE

IT SYSTEMS ADMINISTRATOR INTERN | Ambassadors Insurance Group | May 2026 – Present

- Administer Linux, VICIdial, Asterisk, Apache, and MariaDB environments supporting production call-center operations.
- Troubleshoot SIP routing, VoIP infrastructure, DID management, campaign failures, and telephony workflows.
- Conduct commission audits and reconciliation across multiple insurance carriers using NextAgency.
- Identified root cause of missing commission attribution and executed remediation across 300+ commission records.
- Validated and standardized carrier commission import workflows across 7 insurance carriers.
- Investigated API and automation opportunities for attribution processing and commission operations.
- Developed operational documentation, workflow runbooks, and reporting processes used for ongoing commission management.

PROJECTS

Commission Operations & Attribution Platform

- Audited 24+ commission statements across multiple carriers and verified reconciliation accuracy.
- Built tracking and validation processes for imports, attribution, and exception handling.

VICIdial Infrastructure Administration

- Supported Linux-based call-center systems handling telephony operations, SIP routing, and agent management.

Python Analytics & Automation

- Developed Python-based analytical workflows for data processing, reporting, and operational analysis.
- Applied SQL, statistical analysis, and machine learning concepts through academic and personal projects.

TECHNICAL SKILLS

Languages: Python, SQL, Bash, PHP

Infrastructure: Linux, Asterisk, VICIdial, VoIP, SIP, SSH, Apache, Networking

Databases: MariaDB, MySQL

Operations: Production Support, Incident Management, Troubleshooting, Process Improvement

Cloud & DevOps: AWS (Learning), Docker (Learning), Kubernetes (Learning), Terraform (Learning)

Analytics & AI: Data Analysis, Machine Learning Fundamentals, Data Visualization, Reporting

EDUCATION

Saint Leo University

Master of Science, Computer Science | GPA: 3.585/4.0

Expected Graduation: December 2026
